Press Release

European Aviation Safety Agency Issues First STC for EFD1000 Primary Flight Display

Supplemental Type Certificate Authorizes Installation into Cessna 206 Series Aircraft

Albuquerque, NM, May 19, 2009: Aspen Avionics, Inc., maker of the award-winning Evolution Flight Display system, announced today that the European Aviation Safety Agency (EASA) has issued the first European Supplemental Type Certificate (STC) for Aspen products. This new STC authorizes installation of the EFD1000 Primary Flight Display (PFD) into Cessna 206 series aircraft.

The STC was developed by Avionics Integration & Engineering Corporation, an EASA-certified Design Organisation based in Switzerland. Rights to use this STC are available to qualified EASA Part 145 organizations.

“The European market continues to be very important to Aspen,” said Doug Cayne, Aspen Avionics VP of Marketing. “We are actively working with our European dealers and EASA-certified Design Organisations to assure prompt availability of a broad range of STCs for our customers in EASA-member countries,” he continued.

EASA STCs for several other aircraft makes/models are currently under development.

Updates to the STCs will be available on the Aspen Avionics website at:

About Aspen Avionics, Inc.

Aspen Avionics specializes in bringing the most advanced technology and capability from the commercial and business aviation markets into general aviation cockpits—and budgets. Our products increase situational awareness and reduce pilot workload, making it even easier and safer to fly in both VFR and IFR conditions. The way we look at it, getting the latest avionics technology shouldn't always mean spending a lot of money—on equipment or installation. At Aspen Avionics, we design products to be affordable, easy to install, and easy to own. The company can be found on the web at <http://www.aspenavionics.com>, and may be reached at (505) 856-5034. Print-ready images of the Evolution Flight Display are available at <http://www.aspenavionics.com/pressdownloads>.
