Press Release

Aspen Avionics To Add Synthetic Vision To Evolution Flight Displays

Evolution Synthetic Vision will be available in Q1, 2011

Lakeland, FL, April 14, 2010: Aspen Avionics, Inc. announced today that it will add Evolution Synthetic Vision to its Evolution 1000 Pro Primary Flight Display (PFD) in Q1, 2011. The feature will be available as a software upgrade to Evolution Flight Displays in the field and an option to new Evolution PFDs from Aspen. Priced at \$2,995, the Evolution Synthetic Vision will be the lowest-priced, certified synthetic vision product available. Aspen is displaying the Evolution Synthetic Vision product at the Sun 'n Fun Fly-in this week in Lakeland, FL.

“The combination of the high-resolution Evolution Flight Display screen with the detailed Jeppesen three-arc second terrain data used in our products makes for a very realistic synthetic vision representation,” said Brad Hayden, Vice President of Marketing for Aspen Avionics. “As with all of our products, we are offering the feature at a price that will be very compelling for our customers.”

Evolution Synthetic Vision can be purchased through Aspen authorized dealers. A complete list of Aspen dealers can be found at

About Aspen Avionics, Inc.

Aspen Avionics specializes in bringing the most advanced technology and capability from the commercial and business aviation markets into general aviation cockpits—and

more

budgets. Our products increase situational awareness and reduce pilot workload, making it even easier and safer to fly in both VFR and IFR conditions. The way we look at it, getting the latest avionics technology shouldn't always mean spending a lot of money—on equipment or installation. At Aspen Avionics, we design products to be affordable, easy to install, and easy to own. Our web address is <http://www.aspenavionics.com> or we can be reached at (505) 856-5034.

About the Evolution Flight Display System

The Aspen Evolution Flight Display System is an affordable, expandable and upgradable PFD, MFD and hazard sensor cockpit solution for general aviation aircraft. Highly compatible with existing aircraft avionics, the flexible Evolution Flight Display System lets aircraft owners install all Evolution Flight Displays and options at once, or separately, as their needs and budgets permit.

High resolution Evolution Flight Display images are available at <http://www.aspenavionics.com/imagedownloads>.
