## **Aspen Avionics Announces New, Higher Resolution Terrain Database for Evolution Flight Displays**

*New data improves overall Aspen experience, expands operational area of synthetic vision*

**Albuquerque, NM, January 17, 2012:** Aspen Avionics is pleased to announce the availability of a new terrain database from Jeppesen for Aspen's Evolution Flight Display product line. This new database improves the resolution of the terrain data used in the Evolution System and offers an improved customer experience for the Evolution MFD, notably in markets outside of the United States. In addition, this database resolves some limitations experienced by some Evolution Synthetic Vision (ESV) customers, and expands the ESV operation area beyond the borders of the continental United States to provide full worldwide ESV coverage.

The one-time terrain database upgrade is free for Aspen customers with active Jeppesen data subscriptions and will automatically appear in their Jeppesen Service Update Manager (JSUM) account beginning January 16, 2012. A customer memo has been sent to all registered Aspen customers and dealers with details on how to access the updated terrain file.

For more information on the new Jeppesen terrain database, please visit Aspen's database FAQ web page: <http://www.aspenavionics.com/index.php/database>

### **About Aspen Avionics, Inc.**

Aspen Avionics specializes in bringing the most advanced technology and capability into general aviation cockpits—and budgets. Our products increase situational awareness and reduce pilot workload, making it easier and safer to fly in both VFR and IFR conditions. The way we look at it, getting the latest avionics technology shouldn't always mean spending a lot of money—on equipment or installation. At Aspen Avionics, we design products to be affordable, easy to install, and easy to own. The company can be found online at [www.aspenavionics.com](http://www.aspenavionics.com), and may be reached at (505) 856-5034.

### **About the Evolution Flight Display System**

The Aspen Evolution Flight Display System is an affordable, expandable and upgradeable PFD, MFD and hazard sensor cockpit solution for general aviation aircraft and rotorcraft platforms. Highly compatible with existing aircraft avionics, the flexible Evolution Flight Display System lets aircraft owners install all Evolution Flight Displays and options at once, or separately, as their needs and budgets permit.

High res Evolution Flight Display images are available at [www.aspenavionics.com/imagedownloads](http://www.aspenavionics.com/imagedownloads).
